- 24 hours 7 days a week Accessibility to your store

Business Overview

If you feel your business can only capture a moderate amount of customer to patronage your store, let Mr.POS Online Shop assists you in extending your store space into the world wide web.

Many business owners have started to go online to earn extra revenue and stay competitive. But the real question: *"What does it really take to set up one?"*

The Business Tool

You can easily add-on the Online Shop module to Mr.POS. By having only one location for Centralized Inventory System, you can easily organize and manage the list of items to be listed at your online shop by a click of a button. Upon receiving order from the Online Shop, there will be guided processes to prepare for the delivery. Thus, giving you a full control over your business.

Bringing Extra Revenue

Making your store online at 24 hours 7 days a week would provide a wider opportunity for prospect customer to view your products and giving them the convenience to shop.

Mr.POS Online Shop module requires little resources and internet knowledge, which makes it easy for everyone to manage and handle the operation.

Key Features

- Centralized database for Inventory Control
- Fast Scan for quick selection of inventory
- One click Online Shop inventory update
- Automatic generation of Sales and Delivery Order
- Automatic update on inventory count
- Online Customer Registration
- Online Shop's Sales Reporting

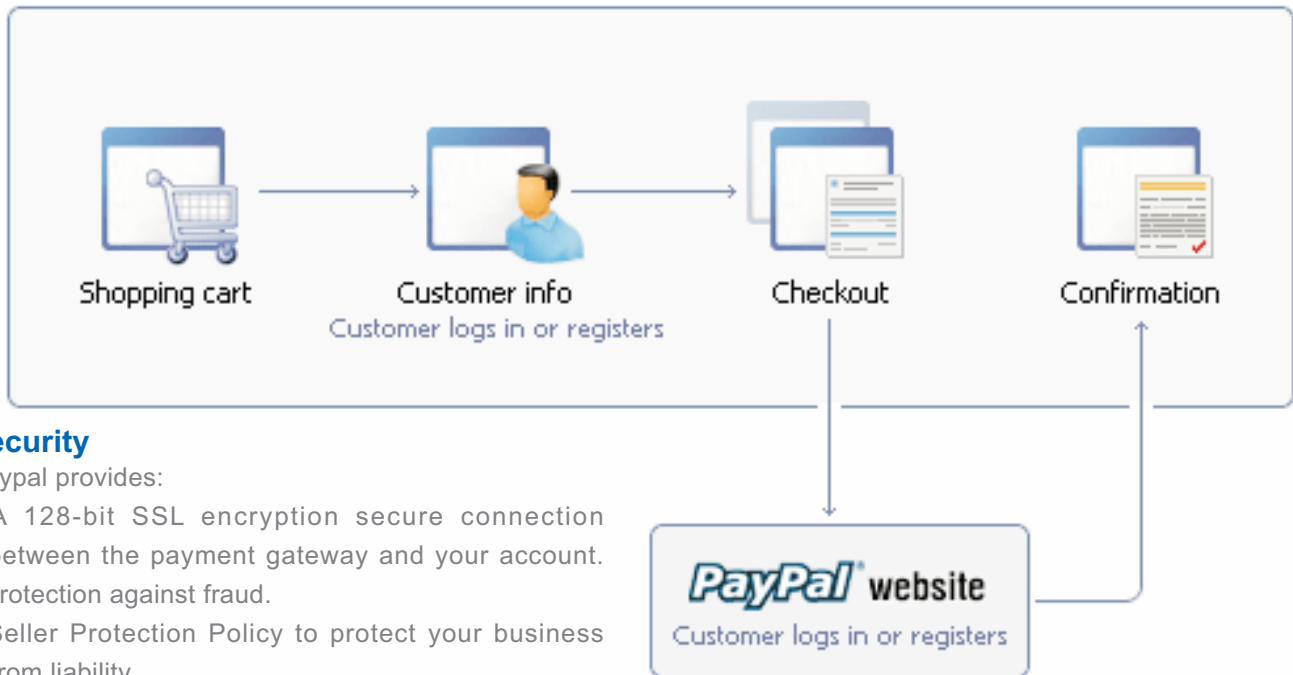

Your Online Shop Website

CellBox provides you the service to design and create your Online Shop Website. Inside you will have a directory list of your items and a shopping cart system where your customer can pick and purchase the item they like. All the administration will be done within Mr.POS Manager Desk. Therefore, you can manage your Online Shop and your current retail shop from one place.

Payment Gateway

CellBox uses Paypal payment gateway. Paypal has been established many years as an international recognized payment gateway.

All the payment processes will be done through paypal and the fund will be transferred to your designated bank account instantly. Please refer to Paypal website (www.paypal.com) for more information on Merchant Account.

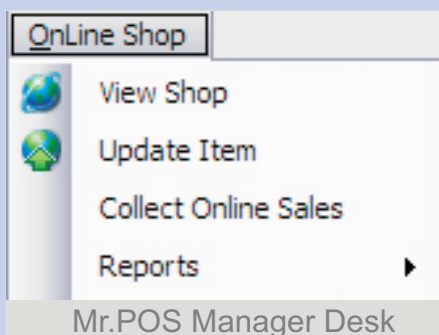

Security

Paypal provides:

- A 128-bit SSL encryption secure connection between the payment gateway and your account.
- Protection against fraud.
- Seller Protection Policy to protect your business from liability.

For more information about security, please visit www.paypal.com
